TECNE 2016

NEW TECHNOLOGICAL CONTENTS

TECNE is an exhibition that has established itself as a central meeting point for the audio visual market in Chile and the region, concentrating the international media, building and networks for professionals, business contacts and the academic world.

CONCEPT→

TECNE is a Technological Tradeshow and Conference which includes the audio visual industry and the academic world in Chile. It has been organized by DUOC for seven years, and this year in its 8th version it will include visitors and exhibitors from neighboring countries.

OUR MISSION→

TECNE aims in this new version to consolidate a space for the interchange and know how, for professionals and technicians, associated companies with formal training, development, production and distribution of contents through a technological tradeshow, workshops, seminars, organizing meetings for audiovisual schools, and contribute to the development of the audio visual industry in Latin America.

VIEW→

To become in future the main meeting point for the audiovisual industry in Chile and neighboring countries, focusing on the transfer of specific knowledge related to innovation and development of new technologies associated to the production and distribution of "content".

VENUE→

Mapocho Station Cultural Center, located in the historical center of Santiago which housed a former railway station, built for the Centennial celebrations of the Republic (1905-1912) and declared National Monument in 1976. His patrimonial infrastructure includes 20,000 square meters and more than 3,400 m2 are in use for the realization of TECNE.
